

Neha Yadav

Front-end web developer

Statement Of Purpose

As I recently graduated from Shree L.R Tiwari College of Engineering . I look to undergraduate study to refine my knowledge and skills in my areas of interest. I believe it will also serve to give direction to my goal of a career as a research professional at an academic or commercial, research-oriented organisation. This would give me the leading edge in technology and the information I require. I did my schooling in Anthony's Higher Secondary School. I stepped into the field of computers after passing SSC and I took admission in Viva college of Diploma and Engineering for studying 'Diploma in Computer Engineering'. In my diploma studies, I have benefited from the breadth of MSBTE syllabi content that has given me a comprehensive exposure to the core areas of Computer Science and a strong conceptual understanding of the same.

In these three year of study, I started acquiring new skill sets and even made myself indispensable with some of the core app development projects. Learning by myself and sharing my knowledge with others has been most worthwhile, when comprehending a concept. During my undergraduate program, I studied some computer system courses such as Data Base Management System (DBMS), Data structures and Algorithms, with hardware maintenance. I have developed an interest in the areas of web development. I made several projects using front-end design technologies such as html,css,javascript,,bootstrap,jquery,materializecss and now currently I focused on to improve my backend skills such as Php,mysql.

As in the age of rapidly developing information technology, I am glad that this age has created precious opportunities for us. As a front-end developer , I am a very versatile learner, able to integrate concepts from different fields and apply them to build projects. In addition to my Knowledge base,I actively seek out new technologies and stay up to date on industry trends & advancements. I like to meet the challenges of a new position and perform my job to the best of my abilities.
